

# Musculoskeletal Support Formula

**IV**  
VERSION

# Joint Support

## A True Innovation in Joint Care

Joint Support has been the leader in joint support nutritional supplements since it first came out in 1999. Version IV represents the fourth evolution of this supplement. Multiple ingredients in Joint Support work along synergistic pathways to decrease inflammation and promote the body's natural synthesis and maintenance joints, ligaments, muscles and tendons, it protects, prevents and helps in the repair of musculoskeletal injuries and inflammation, regardless of the cause.

# MD+ JOINT SUPPORT VERSION IV

Joint Support is formulated to support muscle, cartilage and joint function in many ways.

1. By maintaining tissue integrity it helps prevent musculoskeletal problems.
2. By providing the mechanisms and stimulus for repair of injured or damaged musculoskeletal tissue, whatever the cause.
3. By offering relief for aches and pains.

Multiple ingredients in Joint Support work along synergistic pathways to decrease inflammation and promote the body's natural synthesis and maintenance of joints, ligaments, muscles and tendons, it protects, prevents and helps in the repair of musculoskeletal injuries and inflammation, regardless of the cause.
